AMENDMENT

Sir:

In response to the Office Action of April 24, 2002, please amend the application, as follows:

IN THE CLAIMS

Please amend claims 1-7, as follows:

Sub C
1. (amended) A body mounting display system, comprising:

a display device to be worn by a user and having at least one interface and a first bus line connected to the at least one interface;

a computer situated away from the display device and having a second bus line for outputting signals corresponding to at least display data; and

a radio transmission device disposed between the display device and the computer, and including a computer side output transmission circuit connected to the computer through the second bus line, and a body side output transmission circuit connected to the display device through the first bus line and the at least one interface so that the signals at the computer passing through the second bus line are transmitted to the first bus line at the display device by wireless
